Professional Summary

Software Engineer with hands-on experience in **Full Stack Development, Java Backend Development, and Data Analytics**. Proficient in **Java, Python, JavaScript, React, SQL, Power BI**, and experienced in building scalable web applications, data-driven dashboards, and analytical solutions. Strong foundation in **SDLC, Agile methodology, REST APIs**, and problem-solving with a passion for clean, maintainable code.

Technical Skills

- **Programming Languages:** Java, Python, JavaScript
- **Backend Technologies:** Spring Boot, Hibernate, JPA, RESTful Web Service
- **Web Technologies:** React.js, HTML5, CSS3, REST APIs
- **Databases:** MySQL, SQL
- **Data & Analytics:** Power BI, Pandas, NumPy, Data Analysis, Data Visualization
- **Tools & Platforms:** Git, GitHub, VS Code,
- **Methodologies:** Agile, SDLC

Education

Bachelor of Engineering – Information Science

Dr. Sri. Sri. Shivakumara Mahaswamy College of Engineering, Nelamangala, Bengaluru

2021 – 2025 | CGPA: 8.62

Professional Experience

KodNest | Full Stack Development Intern

Jul 2025

- Developed and maintained **full-stack and backend-driven applications** using **Spring Boot, Hibernate, React, Java, and MySQL**.
- Designed and implemented **RESTful APIs**, enabling seamless front-end and back-end integration.
- Worked in an **Agile environment**, contributing to sprint planning, debugging, and code reviews.
- Improved application performance, reducing page load time by **25%**.

TekkyBench | Data Analyst / Full Stack Intern

Feb 2025 – Jun 2025

- Analyzed **50,000+ records** using **Python (Pandas, NumPy)** and SQL to derive actionable insights.
- Built **interactive Power BI dashboards** for trend analysis and reporting.
- Performed data cleaning and validation to ensure **high data quality and reliability**.

Projects

Emotion-Based Music Player

Tech Stack: Python, OpenCV, Machine Learning

- Built an application that detects facial emotions and plays music accordingly.
- Achieved **85% emotion recognition accuracy** using image processing techniques.
- Improved user experience with a simple and responsive interface.

Business Directory Web Application

Tech Stack: HTML, CSS, React,

- Developed a **frontend-based web application** that allows businesses to list services and users to browse, search, and view business details.
- Built **reusable React components** and implemented client-side routing and state management for smooth navigation.
- Designed a **responsive user interface** using HTML and CSS to ensure cross-device compatibility.
- Implemented basic filtering and search functionality to enhance user experience and usability

Healthcare Readmission Analysis (Power BI)

Tech Stack: Power BI, SQL

- Analyzed hospital readmission data to identify key patterns and risk factors.
- Created dashboards with charts and KPIs to support **data-driven healthcare decisions**.
